YOU WERE BORN AS AN INTUITIVE BEING. Your intuition is your direct communication link to your soul and universal consciousness. You were born with natural intuitive gifts. You may even have a unique style of receiving intuitive insight. Like many people living in this fast-paced information age, you may be keeping your intuitive gifts buried deeply within. Or you may wish to strengthen them. Whatever it is, this course can help you attune to your intuitive gifts and natural style.

Are these important goals for you? Would you like to be able to quickly attune to your intuition for everyday insight and success - in your personal life, in relationships, or at work and in business? Do you crave a more meaningful life? Do you want to be successful from within? Do you want to stop struggling and tune in to the flow of the universe?

This course will help you to:

- Discover your unique intuition style
- Learn how to work with different kinds of intuition
- Align with your intuition to make better decisions
- Use special techniques to turn on your intuitive right away
- Distinguish what to go ahead with and what to stay away from
- Reveal important insights on everyone's real agenda
- Focus on what's really meaningful to you

Intelligence, without the guidance of intuition, is fundamentally unsound. It's like having a ship without a navigation compass. Yet, it is the way many people function these days. Each lesson has three parts, The lesson, A Practice Exercise, and a Daily Meditation Audio.
